MSL Future

Bad 2009	Good 2009
➢ Libraries are run by IT people	1 IT people support & work collaboratively with & for libraries
➢ No money for children's books	2 administration see the value of maintaining & growing services to/for kids
➢ Libraries are cut out of the budget (non-essential)	3 libraries are well-funded, staffed & are appreciated
➢ Libraries are back to being isolated & alone	4 have access to the same information
➢ The government restricts access to the Internet	5 access to the Internet is unrestricted
➢ MSL did not transform itself from "public library" model	6 MSL has transformed itself into a special library for state government with a robust consulting service to the public library community.
➢ MSL has wonderful services that have no relevance to end users	7 MSL has a clear definition of its users and provides services that meet their needs
➢ Lose partners/connections	8 MSL has trustworthy responsible partners, & a robust network infrastructure.
