Digital Equity & Montana Libraries

August 3, 2022

Jennie Stapp, State Librarian

What is Digital Equity?

Digital equity is a condition in which all individuals and communities have the information technology capacity needed for full participation in our society, democracy, and economy.

Digital equity is necessary for civic and cultural participation, employment, lifelong learning, and access to essential services.

National Digital Inclusion Alliance, [Definitions - National Digital Inclusion Alliance](#)

Montana State Library Digital Equity Work

1996

Telecommunications Act passed by Congress

Infomine of the Rockies contract

1997

Library Technology Consultants first hired

Library Services and Technology Act (LSTA) funds used to connect libraries

2010-
2012

Broadband Technology Opportunity Program Grant

2019

Broadband in MT Libraries study

2020

Hot Spot Lending Program

2021

American Rescue Plan Act (ARPA) Internal Wiring Project

2022

Montana applies for Digital Equity Act funds

Early Investments in Digital Equity

Telecommunications Act of 1996 passed by Congress

In part, the act allowed for increased investment in the Internet

The Federal Communications Commission established the E-rate fund and requires

Libraries are required to create technology plans to be approved by the State Library

The State Library helps libraries submit E-rate applications to supplement the cost of internet service

Early Investments in Digital Equity

August 1996 InfoMine of the Rockies contract

State Library funded a two-year contract to provide Internet service for public libraries

Annual contract amount was \$46,000 for 27 libraries

The State Library was one of the first agencies to go "online"

Early Investments in Digital Equity

At the April 16, 1997 State Library Commission meeting, the Commission allocated \$345,020 of 1998 LSTA funds to:

Connect 51 libraries to the Internet

And to hire two technology consultants to assist libraries

Suzanne Reymer, our longest serving consultant, has been on staff since 1999

Broadband Technology Opportunity Program

Grant funded by American Recovery and Reinvestment Act dollars

Updated public access computers in libraries

E-rate application support to supplement the cost of internet access

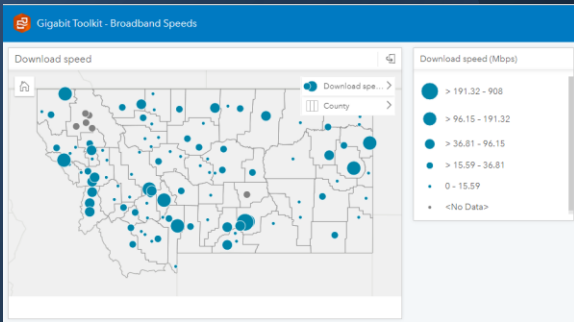

Digital literacy training programs

Technology "petting zoos"

Over 18 months, 62,000 Montanans participated in technology trainings at their libraries

[Final Report Executive Summary](#)

Broadband Access in MT libraries

The 2015 FCC E-rate Modernization Order established Internet guidelines for public libraries:

- Libraries serving fewer than 50,000 people should have broadband download speeds of at least 100 Mbps
- Libraries serving 50,000 people or more should have broadband download speeds of at least 1 Gbps
- [Summary of the E-Rate Modernization Order | Federal Communications Commission \(fcc.gov\)](https://www.fcc.gov/summary-of-the-e-rate-modernization-order)

100 Megabits per second (Mbps) download speeds allows multiple, simultaneous Internet users to fully participate in a synchronys online world.

In 2019 the State Library funded a study of Broadband access In MT libraries. The study:

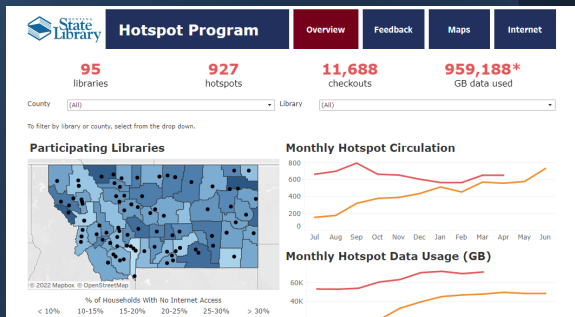

Identified broadband speeds in Montana libraries and

Prioritized needs for hardware upgrades to improve broadband speeds in libraries

In 2020 the library was the only source of free Wi-Fi in 28 communities with libraries

[Gigabit Toolkit Dashboard](#)

Hot Spot Lending Program

Nearly 1000 hot spots are circulating through public, school, and academic libraries

Monthly cost is approximately \$40,000 for devices and data plans through Verizon, T-Mobile, and Nemont

Funded through LSTA, CARES Act and ARPA dollars, funding is available through FY '23

To date, Montanans have used nearly 1M Gigabits of data through the hot spots

"Thank you for making the mobile hotspots available. We used it to live stream my uncle-in-law's funeral. He passed away unexpectedly and lots of family and friends were unable to travel to Butte for the service. "

In addition to hot spots, some libraries lend laptops and tablets

[Hot Spot Program Dashboard](#)

Internal Wiring Project

The State Library is investing \$650,000 of ARPA dollars to address some of the needs identified in the Broadband in MT Libraries study

The study found that 40% of libraries have outdated wiring and Wi-Fi equipment including routers older than five years.

The State Library procures equipment and hires contractors to complete the upgrades in between 25 and 30 libraries

Montanans benefit from more stable Internet connections with better Wi-Fi in their libraries

Library staff have more information to better manage and support their wide area networks.

To receive upgrades, participating libraries are asked to upgrade their Internet speeds to 100 Mbps

Digital Equity through MT Libraries

Providing public access to 100Mbps Internet in libraries is especially important in Montana. According to BroadbandNow, Montana ranked last among all states in 2022 for broadband access.

28% of Montanans do not have access to 100Mbps broadband.

All Montana public libraries have Wi-Fi and delivered 944,256 Wi-Fi sessions in 2019.

Montana libraries offer 938 public access computers

In 2019, Montanans used library computers 828,760 times.

Montana ranked 13th for computer use in libraries nationally

Montana libraries offered 45,966 one-on-one technology assistance sessions last year.
